

Genomic medicine here to stay? Have your say.

We need non-genetic medical specialists who work clinically in Australia to tell us about genomics in healthcare, present and future. It doesn't matter if you do or don't know much about this, or don't currently incorporate genomics into your practice; your opinions, views and experiences are valuable to us.

Click [here](#) to complete the **15-minute** anonymous, online survey.

Your input will help shape future workforce practices and continuing education and training programs.

For queries, contact [Dr Amy Nisselle](#). This is an NH&MRC-funded *Australian Genomics* activity (University of Melbourne HREC 1646785.8).
